

```

count=0
while count<3:
R=input("Enter the username: ")
Q=input("Enter the password :")

if R=="Micheal" and Q=="e3$WT89x":
print("successfully logged in"
else:
count+=1
print("Invalid username and password")
if count==3:
print("Account Locked")

```

The screenshot shows the OnlineGDB beta IDE interface. The main area displays the Python code. The terminal window at the bottom shows the execution results, indicating that the program successfully logged in.

```

File "main.py", line 3
    R=input("Enter the username: ")
    ^
IndentationError: expected an indented block

...Program finished with exit code 0
Press ENTER to exit console.
